C HICAGO, April 2.—Six thousand people in a hall, the sealing capacity of which is but 5000, gave encouragement to the President when he stopped upon the stage of the Auditorium tonight. The great building has he more unstincted in its applause for any man than the crowd that filled it tonight. From the first floor to the roof, it was packed to its utmost capacity. Every seat was occupied, and although the asiles were kept clear, all the space in the lobbles and on the stairways was taken, and even the passageways leading to the hall from dreds of men who were utterly unable to hear a word of the President's address. All that came to them was the roar of applause from within, and with such loyal tongues did they accept their cae that several times they were giving went to cheers when those on the inside had died away, and the president was compelled to send word to the particise without the door that they must cheer in better time, or he would becompelled to clear the stairway.

In the street outside, for more than an hour before the time set for the opening of the President's address amal assemblies of policeomen were knowned to clear the stairway.

THE PRESIDENT'S ADDRESS.
The address was as follows:
Mr. Chairman, Ladies and Gentlemen: Today I wish to speak to you, not merely about the Monroe doctrine, but about our entire position in the Western Hemisphere—a position so peculiar and predominant that out of it has grown the acceptance of the Monroe doctrine as a cardinal feature of our foreign policy: and in particular I wish to point out what has been done during the lifetime of the last Congress to make good our position in accordance with this historic policy.
Ever since the time when we definitely extended our boundaries westward to the Pacific and southward to the Gulf, since the time when the old Spanish and Portuguese colonies to the south of us asserted their independence, our nation has insisted that because of its primacy in strength among the nations of the Western Hemisphere it has certain duties and responsibilities which oblige it to take a leading part thereon. We hold that our interests in this hemisphere are greater than those of any European power possibly can be, and that our duty to ourselves and to the weaker republics who are our neighbors requires us to see that none of the great military powers from across the seas shall eneroach upon the territory of the American republics or acquire contol thereover.

"The President of the United States, appreciating the courtesy of the German government in making him acquainted with the state of affairs referred to, and not regarding himself as called upon to enter into the consideration of the claims in question, believes that no measures will be taken in this matter by the agents of the German government which are not in accordance with the well-known purpose, above set forth, of His Majesty the German Emperor."

Sir Michael Herbert to the Marquis of Lansdowne:

"WASHINGTON, Nov. 13, 1992.
"I communicated to Mr. Hay this morning the substance of Your Lordship's telegram of the 11th inst. His Excellency stated in reply that the United States government, although they regretted that European powers should use force against Central and Bouthern American countries, could not object to their taking steps to obtain redress for injuries suffered by their subjects, provided that no acquisition of territory was contemplated."

Both powers assured us in explicit terms that there was not the slightest intention on their part to violate the principles of the Monroe doctrine, and this assurance was kept with an honorable good faith which merits full acknowledgment on our part. At the same time, the existence of heatilities in a region so near our own borders was fraught with such possibilities of danser in the future that it was obtained. Talbot J. Taylor vs. the Southern Pacific and Union Pacific will go to Judge Lurton tomorrow morning. It only remains for Senator Foraker to conclude his argument, which was started and the greater part of which was finished this afternoon.

Judge Lurton stated to a representative of the Associated Press tonight that he expected the case to be concluded before noon. He said it would be two or three days before he would render a decision. There is a vast amount, of consideration to be given the matter, involving not only fine points of law, but immense property holdings. It would probably be the first of next week, Judge Lurton said, before he would finish his deliberation on the case and announce his decision.

CONSTANTINOPLE, April 2.—Details of the attack on M. St. Cherbina, question involved, after all, he claimed, was that of jurisdiction. After investigation, he declared, he believed the Union Pacific was not necessarily a party to be named in this suit and to be brought into court, but that the Union Pacific would come into court and make defense, if the court would so permit. At 5 o'clock, in the midst of Senator Foraker's argument, Judge Lurton announced that court would be adjourned until 2:20 o'clock tomorrow morning. At this time Senator Foraker will complete his argument.

The affidavits of James R. Keene and Edward Lauterbach were introduced as evidence. Keene's affidavit was in substance that he had never authorized the sale of his Southern Pacific atock. FORESTRY EXPERIMENTS.

IN SOUTHERN CALIFORNIA. BY THE ASSOCIATED PRESS-P.M.1 THE ASSOCIATED PRESS-P.M.: BERKELEY, April 1.—Forestry ex-eriments on a larger scale than ever efore will be carried on by the Uni-ersity of California agricultural ex-eriment station at its feestry subperiment station at its freestry substation at Chino in Northern CaAliforinia, and Santa Monica in the south. Arnold V. Stubenrauch, assistant horticulturist and superintendent of substations, who will have charge of the work, leaves tomorrow for an extended trip through the south, during which he will direct the planting of a grove of eucalyptus trees. Individual trees have done well here, and it is now proposed to see if they can be utilized in forest areas, so as to re-timber the bare mountains of Southern California for the purpose of insuring a permanent water supply.

At the Chico sub-station, four acres have just been planted with cork oaks to the number of ten thousand. In addition, two other acres have been set out in tan-bark oaks. This experiment is undertaken with the object of learning whether it can be made possible to grow these varieties in California on a profitable basis.

Horticulturist Steubenrauch has arranged in the itinerary of his coming trip to visit San José and Hollister, where he will investigate the split-pit trouble of the peach tree, and Watsonville and Oxnard, where he will direct the planting of beach brass on the sand dunes.

SENTENCE COMMUTED. IBY THE ASSOCIATED PRESS-A.M. WASHINGTON, April 2.- The President has commuted to expire at once the sentence of Edward Grant, alias Edward Guerrant, who was convicted before United States Judge McDowell of the Western District of Virginia for contempt of court, and sentenced Ocof the Western District of Virginia for contempt of court, and sentenced October 9, 1992, to imprisonment for eight months in the Washington County Jail at Abingdon. Grant was a labor organizer of the United Mine Workers, and was adjudged by the court guilty of contempt in disobeying an order of the court by endeavoring to interfere with and intimidate employes in one of the coal mines. The attorney recommended a commutation, on the ground that the punishment of eight months imprisonment was excessive.

I must have been in a truly pitiable condition from been in a truly pitiable condition from what my friends have since told me although at the time I am sure I did not half realize the seriousness of my case. My parents decided to send me on a trip to Southern California.

"On the train I made the acquaint in my case. He heard my story and advised me to try Grape-Nuts, a food greatly relished by his own family. From what he told me of the food I longed to try it, but I did not expect to find it beyond the Rocky Mountains. To my surprise on arriving at Los Angeles I noticed a box of Grape-Nuts on my aunt's side-board. That marked the beginning of my health and comfort. NOTABLE SPEECHES AT HOME MARKET CLUB.

ROOT DISCUSSES TARIFF AND LODGE THE PHILIPPINES.

Secretary of War Succinctly Points Out the Dangers That Attend Even Pevision - Massachusetts Senator Exceriates the Filipino-Democrats.

[BY THE ASSOCIATED PRESS-P.M.] BOSTON, April 2.—Elihu Root, Sec-retary of War, and United States Sen-ator Henry Cabot Lodge of Massachuator Henry Cabot Lodge of Massachu-setts were the guests of honor and the principal speakers tonight at the an-nual dinner of the Home Market Club at the Hotel Somerset. The occasion speeches of Secretary Root and Sen-ator Lodge were regarded practically as the words of the administration at Washington on the anticipated issues of the next national canyass. tary Root spoke on the tariff. He said in part:

"There is no fetish in the tariff schedules, and no sacredness in par-ticular rates of duty. If through original error or changes of condit provisions of the law work ill to the country, then at the proper time, and in the proper way, a sensible people will change the law. If the law is working well as a whole, common sense requires that we should endure some faults, even though they be se-rious, rather than destroy the gen-

rous, rather than destroy in early constant tinkering.

"A revision of the tariff is a great and difficult task, not to be undertaken except for grave and serious reason. The decrees of an absolute monarch can make and change the tariff laws without discussion or de-

monarch can make and change the tariff laws without discussion or delay, but 14,000,000 voters represented by 388 Congressmen and 90 Senators cannot. The effect of this discussion furnishes the chief reason why revision should not be undertaken until it becomes a real necessity.

"A second consideration is that you cannot get rid of trusts by revising the tariff, unless you are ready to reduce the duties in the classes of manufacture in which the so-cailed trusts are engaged—that is to say, in all the principal kinds of manufacture—to such an extent as to put an end to all American manufacture.

"A third thing to be remembered is that out of no possible revision is any-body likely to get the kind of tariff law that he wants.

"In determining when and how revision shall be undertaken, two cardinal rules should be observed. First, it should be done only when Congress is as free as possible from the distractions and temptations of an active political campaign.

"The second rule to be followed is ex-

ampaign.

'The second rule to be followed is expressed by the oft-repeated saying that the tariff should be revised by its friends. Whatever principle the people of a country wish to have embodied in a tariff law, the men who believe in the principle should frame the law. If the American people are ready to abandon the principle of protection and face, the crash and downfall of our present prosperity, which would immediately result, then they should hand the revision over to the Democratic party and that is the meaning of the men who are crying revise the tariff in order to destroy the trusts.'

metal since 1901, threatens to cause eventually, even in the opinion of the most optimistic, disturbances outmetering all advantages derived from the rise in foreign exchange. This and the knowledge that other nations using silver as a monetary once are meditating changes in their currency systems, incited the executive to seek the cooperation of the United States, being already assured of the aid of China, for the purpose of joint study of this important matter, and to being about fixed relations between gold and silver among the countries empfoying these different standards.

"The new sliding scale of duties on foreign imports," says President Diez, "has given excellent results so that whatever may be the rate of exchange, there will be an equilibrium of outgo and income, and the government is certain of its ability to make payment of its gold interest abfoad."

We believe that any officer or man guilty of such conduct should be tried by court-martial, and we believe that that has been done. But we also believe that some considshould be tried by court-martial, and we believe that that has been done. But we also believe that some consideration should be given to the circumstances under which these cruelties cruelties cruelties cruelties. her, and ten minutes later had drawn clear ahead, the distance covered heing between four and five miles. Although the challenger proved faster in this run before the wind, she hardly demonstrated the superiority expected. After starting on another turn to windward, from Largs to Rothesay, about six miles. Shamrock III again outfooted her opponent on every tack. The wind freshened, but the fresher it became the better it seemd to suit the new boat, which finished this beat to windward half a mile ahead. On turning, the yachts set their spinnakers for another trial down the wind. The Shamrock I was about three minutes astern at the star, but with a better wind from the bay, she shortened the gap until she was barely two minutes behind.

the Reliance, made this statement to-night, after reading of the trial of the Shamrock III. He had just returned from Aiken, S. C., and it was the first time he had ventured public opinion upon the new challenger. "After reading these flattering re-

ports from the other side," continued Iselin. "I do not doubt the worth of Sir Thomas Lipton's new product. It must be a wonderfully-fine yacht, and is probably, as Sir Thomas says, the best boat that the English have pro-duced to try for the cup. It is not my thought to question the claims that are made for the Shamrock III, but I may "It has been my observation that

the English people often get over-excited about their yachts during tests, and allow enthusiasm to get a little the best of them. Our Bargain-Friday sales have steadily gained in popularity. Now Friday is one of our busiest days. When this store commenced setting Friday aside as a bargain day for the disposal of remnants, short lines and broken assortments, this was the dullest day of the week. How different now. The manager of an evening newspaper remarked recently that two years ago the Thursday night papers carried very little display advertising, and now

the display advertising of Thursday evening is the heaviest of the week. The copying of our Bargain-Friday

sales is indeed a compliment to Broadway Department Store methods which we appreciate and acknowledge. The public knows full well that for all the Friday surprises to which they are treated The Broadway Department Store

is entitled to the credit. This week's bargain list will give you a hint at the true reason of the popularity of these

Bargain-Friday sales of ours. But remember, the shortest lines show the greatest price reductions, and these find no newspaper publicity; you must visit our store to get in touch with the best bargains for Friday.

BARD AS A STATESMAN.

Recognized as a Man of Force in the Senate.

Senator Beveridge's Estima of His Services.

Much Attention Commanded by His Speech on Statehood Bill-Will He Return?

By Edward S. Little.

SPECIAL CORRESPONDENCE OF THE TIMES. WASHINGTON, March 26.—There was a time in the history of the United States, when to be a great orator was of prime importance in a Senatorial career. In those days great orations were delivered in the Senate, and the orations had their effect upon the Senate and upon the country. The Senators who were capable of de-

livering great orations were the men who formulated and carried out the policies of the Senate—they were the men of influence there.

The most finished orator in the Sen-ate now is George F. Hoar of Massa-chusetts, a scholar of great learning, a statesman of high attainments, and a finished gentleman of the New England type away. With the exception of Sena-tor Hoar, William C. Endicott, one time Secretary of War in the Cabinet of President Cleveland, was the last of this type to occupy public place in Washington. Senator Hoar, however wide may be his worldly knowledge, however broad may be his range of public duty, is the man who is bound to become a power in the Senate, if he so elects. Aldrich, Allison, Platt of Connecticut, Hale, Quay—not one of these men can make a really finished speech. They all talk fairly well, but they are not content.

these men can make a really finished speech. They all talk fairly well, but they are not orators.

One day last winter. The Times correspondent was having a chat with a young Senator Mr. Severidge of Indians, the chairman of the Senate Committee on Territories, about the Statehood Bill. Senates Part of California is a member of that committee, and was opposed to the passage of the bill, as was Senator Beveridge. The conversation turned, finally, upon the subject of the Hon. Thomas Robert Bard of California, as a Senator of the United States, and Senator Beveridge said, in substance, this:

"Senator Bard is one of the growing and coming men of the Senate. I remember well when he first came into the body, took his seat and began the study of legislation. He was so retiring that few of the Senators got acquainted with him at first, but it began to be seen presently that here was a man whose advice was worth having, and his advice was soon sought. At this time there is no Senator whose advice if would rather have upon a matter that he has considered than Senator Bard, and I have heard Senators who are old in the service say the same thing. It is today generally recognized that Senator Bard's advice is as sound as a rock—that you can't move him by any little storm that comes up. He has become a power for conservatism in the Senate."

Senator Beveridge said this with a good deal of intensity. His enthusiasm over Senator Bard as a careful adviser upon important matters was born of direct experience upon more than one occasion, as he himself was free to admit, and what is set down here as his

direct experience upon more than one occasion, as he himself was free to admit, and what is set down here as his opinion of Senator Bard contains nothing of the personal enthusiasm exhibited by the brilliant Indianan.

Without referring to the records that have been made by the men who have represented California in the Senate from the beginning of her secretary

have been made by the men who have represented California in the Senate from the beginning of her Statehood down to the present—and they are a goodly company, as a whole, with some brilliant examples among them, one of the most conspicuous being that Democrat of fragrant memory, Stephen Mailory White—the mark that Senator Bard is making among his colleagues is certain to reduce.

This is expected to have a beneficial effect on the use of oil has been such as to prevent its use as fuel in competition with coal, but when the refineries are completed refuse from them will be sold cheaper. The Southern Refinery will be open for business this week. It is said to have sold its maximum output of twelve months. The Burt output of twelve months. The Burt refinery will be in operation next week This plant covers a hundred acres. It is the biggest refinery in the world, and is generally understood to belong to the Standard Oil Company. The plant has cost between \$3,000,000 and \$4,000,000. It has provided for partial supply of oil by the purchase of nine-teen wells. The Union refineries, backed by Beaumont capital exclu-sively, has had several setbacks and will not be ready for business until

SANTA BARBARA.

SANTA BARBARA April 2.—A strike among the teachers engaged in the public schools of this city is the very latest event of importance in Santa Barbara. There will be no wield-ing of bludgeons, the flash of the in-cendiary torch, or, probably, not even threats of wholesale resignations to teaching the young Santa Barbara idea "how to shoot." But something will happen unless the City Board of Education consents to an increase in salaries for those of the various salaries for those of the various de-partments of the grammar and high schools. This afternoon a meeting of the teachers, which had been quietly called, was held at the new High School building for the purpose of dis-cussing the situation. Nearly every teacher in the city was there. It was argued that, because of the increased cost of living, there should be a pro-portionate increase in salaries. One of the teachers declared with great em-phasis that she had made a study of phasis that she had made a study of the comparative sales of wages received and had found that there were any number of unskilled laborers in the city who were receiving more money for their services than were teachers in the High School or other departments of the local sducational service. There was much discussion as to the exact amount of increase that should be asked from the Board of Education, but no definite conclusion was arrived at on this point. It is expected, however, that an agreement

Dissatisfaction in Arisona.

It is necessary to accept as conclusive, apparently, the advice that President Roosevelt's litinerary cannot be so changed as to permit him to visit Phoenix, or even Prescott. But the more one atudies 'ne time table provided for Mr. Roosevelt's movements in the West the more impossible it is to understand why at least a few hours cannot be given to this Territary in addition to the stop at the Grand Cañon. When the President's western trip was definitely decided upon, some months ago. Gov. Brotie was prompt to extend a cordial invitation to his old comrade to so arrange the schedule as to permit a visit with the people of Arisona, and the President at once accepted, in terms which were considered positive. As Mr. Roosevelt has never been here, he may be excused for supposing that a trip to the Grand Cañon will give him an adequate idea of the entire Territory. But there are people who were consuited when the itinerary was made up, or at any rate were on hand to offer advice—who might have thought they were doing something "smooth" by steering the President around the central portion of the Territory, and away form everything that might denote progress and civilization. Senator Bard, for instance. The Washington dispatches star that the junior California Senator was very prolific of suggestions concerning the details of tid trip through the Paelid Cosat country.

The time table provides that Mr. Roosevelt after a brief stop to view the Grand Cañon of Arizona, shall arrive at Barstow Cal., on the morning of May 18. Inclusive of these dates, the President will spend tweive days in our neighboring States. Before he reaches Los Angeles he will stop at San Bernardimo. Riverside, Claremont, a dinky college at a dinky town called Pomona. Pasadena and nogsibly smaller places. After Los Angeles he is to stop at Ventura. Sants Barbara. San Luis Obispo. Monterey and then San Francisco and so on.

TORTURING DISFIGURING

Skin, Scalp and Blood Humours From Pimpies to Scrofula from

Infancy to Age.

Speedily Cured by Cuticura When All Else Fails

The agonizing itching and burning of the skin, as in Eczema; the frightful scaling, as in psoriasis; the loss of hair and crusting of the scalp, as in scalled head; the facial disfigurements, as in acne and ringworm; the awful suffering of infants, and anxiety of wornout parents, as in milk crust, tetter and salt rheum—all demand a remedy of almost superhuman virtues to successfully cope with them. That Cuticura Soap, Ointment and Resolvent are such stands proven beyond all doubt. No statement is made regarding them that is not justified by the strongest evidence. The purity and sweetness, the power to afford immediate relief, the certainty of speedy and permanent cure, the absolute safety and great economy, have made them the standard skin cures, blood purifiers and humour remedies of the civilized world.

Bathe the affected parts with hot water and Cuticura Soap, to cleanse the surface of crusts and scales and soften the thickened cuticle. Dry. without rubbing, and apply Cuticura Ointment freely, to allay itching, irritation and inflammation, and soothe and heal, and, lastly, take Cuticura

MUNYON TALKS PRESIDENT DECLINES TO WOMEN.

Tells How They May Have a Beautiful Complexion and Grow Luxu-

Hazel Soap is really a skin food and vitalizer. The only soap containing witch ha-zel-its success has caused imitators to brand their soap witch hazel; these words cannot be trade-marked. See that the soan is stamped Mur-

as food nourishes the body. It puts every pore into a healthy condition: as-Hazel Soap, using water as hot as the skin can bear. Relief will be immediate. There is not a case of dandruff, and I know of no scalp disease but this soap will cure.

For Easter!

You would think yourself in swell salons of Paris and New York, such a wealth of beautiful Hats is here.

Wonderful becoming creations in Maline Chiffon, and Novelty Gelatine Hats. Where in all the land will you find a more charming display than in this big store. Here is more space given to Millinery than in any other two stores

in the city.

Dato Pagliman Hassan, Most Powerful Leader in Jolo, Gives Assurances to Col. Wallace.

MANILA, April 2.-[By Manila Ca-

ole.] The situation in Jolo is more promising. Dato Pagliman Hassan the most powerful native leader, vis-ited Col. Wallace and accepted the colonel's explanation of American policy. He promised to be peaceful.

There has been considerable intertribal trouble, but no demonstrations
have occurred lately in Jolo against

Jolo Island. The general, as represen-tative of the Philippine government, will go to Jolo shortly, and have a conference with the Sultan. The government is desirous of abrogating the Bates treaty with the Sultan, which has proved unworkable and which con-

has proved unworkable and which conflicts with the American laws. The government also wishes to establish a government for the Moros, and formulate a definite Moro policy.

At present the military authorities exercise general control over the datos. The military prevent the recapture of fugitive slaves and punish flagrant crimes, but they do not interfere with slavery, polygamy or tribal customs. The general conditions are unsatisfactory and reform is imperative. The government has heretofore refrained from taking action, as it did not desire to cause trouble.

FRANK G CARPENTER will tell the waders of The Times Magazine the coming sunday what he thinks about Emperor Wil-iam and Germany's business relations with merica.

PREDERIC J. HASKIN. The Times' special correspondent in the West Indies, will tell readers of the Times Magazine the coming sunday what developments have taken place in Porto Rico under the American regime.

INVITATION TO RIDE.

WILL NOT ENTER FLORAL-DAY PARADE OF LA FIESTA.

Offers to Address People from Reviewing Stand in Afternoon-Governor to Extend Welcome at State Line-Committees Appointed.

Word has been received from the President declining the invitation to occupy a carriage in jeither of the parades that will take place on Floral Day of La Piesta. He states that he will if it is so desired, address the people of Les Angeles from the official reviewing stand immediately upon the dismissal of the afternoon parade. This stand will be in front of the City Hall. in front of the City Hall.

The Governor and party of about forty, who are to meet the President at the State line, will be quartered at the principal downtown hotels. A special escort will meet the Chief Excentive at the depot, and accompany has to his hotel.

In anticipation of the arrival of the President, the following general committee, composed of committees from different organizations of the city, has been appointed, to have charge of events connected with his stay in Los Angeles: Executive Committees—Al. MRS. EDNA PENDLETON CHARGED WITH PENITENTIARY OFFENSE.

Woman and Male Consort Arrested at Riverside for Obtaining Money Under False Pretenses-Man to Be Prosecuted

in Orange County.

Mrs. Edna Pendleton, who claims to be the wife of Charles Pendleton, a younger brother of State Senator "Corney" Pendleton, was returned to Los Angeles from Riverside yesterday by Detective Flammer, and locked up in the City Jail on a felony charge of obtaining money by false pretenses. With Pendleton the woman was arrested in Riverside Wednesday evening, she on the charge lying against ing, she on the charge lying against her in this city, and he on a charge preferred by the authorities at Fullerton. He will be held in jail in Riverside until an officer from Orange county goes after him. Accompanied by her baby, less than a year old, she was brough here and ledged in a city. by her baby, less than a year old, she was brought here and lodged in a cell. To the officer, the woman told nothing of the crime charged against her, her only statement being that if she and her husband succeeded in getting clear of the charges now pending against them, she hoped the experience would teach them sense. She is a tall, comely woman, well dressed and ladylike. She took her arrest coolly, seeming to care only for the comfort of her child. Her case will be presented in the Police Court today. It is probable that an effort will be made to compromise the matter, but if the complaining witness insists upon prosecuting the case, the officers declare the accused will have a difficult time clearing herself of the charge. At Riverside the couple is said to have obtained funds by renting pianos and then selling them from their rooms.

From Fullerton comes the informa-

and then selling them from their rooms.

From Fullerton comes the information that Pendleton and his supposed wife have been traveling under the name of Charles Holmes and wife. They are alleged to have contracted debts amounting to more than 1178, but what representations they made to secure favor from those with whom they dealt in Fullerton, is not known.

They left Fullerton between two days, walking to Anaheim. Hearing of their questionable workings elsewhere, warrunts were sworn out in Santa Ana, charging the man with obtaining money under false pretenses.

obtaining mosey under false pretenses.

The prisoners are said to be unmarried, being practically cast off by their
families. The woman is the daughter
of a prominent local druggist, and
some of her relatives are said to have
already interested themselves to secure her release. Her case will come
up in the Police Court today, and it
is probable that an effort will be made
to compromise the matter. The officers say that if the complaining
witnesses are determined to prosecute,
the evidence appears strong enough to
send her to the penitentiary. The
woman was unable to give 1500 bond
demanded by the court, and spent last
night in jail.

BOY KILLED BY CONSTABLE.

SEDAN (Kan.) April 2.—Alonzo Hamon, aged 15 years, was shot and killed here early today by Constable Robinson. Hamon, imagining a fancied wrong against the cashier of the Sedan Savings Bank, had threatened to wreck the bank with dynamite. He approached the bank building, and when Constable Robinson ordered him to halt, reached for his revolver. The officer fired first, the builet from his rifte striking Hamon over the heart, killing him instantly.

The outburst occurred when Frank
G. Fishyson of this city was making
the cising address at the Jeffersonday hasquet of the Iroquois Club, at
the Del Monte. Mr. Finlayson, in an
exclust speech, had reviewed the hising of the Democratic party, extolling
Jefferson, and claiming that the principies of the party at the present day
were still those that were enunciated
by the party's early leader. One by
one, he took up these principles and apfilled them to the Democracy of the

organization if the party is to succeed organization if the party is to succeed in comfing campaigns.

A touching tribute was paid to the late Senator Stephen M. White during the course of Mr. Popper's address, when a toast was drunk in silence to the memory of the dead statesman. In leading up to this point, Mr. Popper reminded his hearers that it rests with the dead Senator for the good that was in him and for the good that he accomplished for the State.

"Weakness."

That condition commonly known as 'weakness'' is merely a sympton of hronic inflammation in the prostate

gland. It is not weakness at all, though time it brings general debility through its depressing influence upon the mind of the sufferer. I dreat for the influentation only and use a local process, entirely, and in years I have not failed to obtain complete and per-

manent results. The cause of "weak, ness" was discovered by myself, and no other physician can duplicate my cures.

Piles.

No matter how severe or of how long standing. I will permanently cure every case of piles that comes to me for treat-

ment. I am constantly curing cases other physicians have been unable to relieve. My treatment is mild, gentle and certain, and my practice in this disease constantly grows as a result of recommendations from those whom I have cured.

AERONAUTS FATALLY INJURED.

BUDA PEST, April 2.—Three balloonists, ex-Deputy Ordody, Lieut, Kral and M. Kubek, a brother of the member of the Diet of that name, were fatally injured in a balloon accident today. While the balloon was being flattened, it suddenly broke away with the car containing the men named, and Capt. Tolrey of the navy.

M. Ordody fell out of the car to the roof of the factory. Lieut. Kral punctured the balloon, which descended with great velocity, striking with such

knowledge, and because they do no

lew days' time. There is no pain, and it is seldom necessary that the patient be detained from his occupation. Normal circulation is at once restored throughout all the organs, and the natural processes of waste and repair are again established. If you are afflicted with varicocele, consult me at once. Delay can but bring on aggravated conditions and nervous complications that will impair the vital functions and involve the general health.

Reflex Ailments Often the condition appearing to be the chief disorder is only a reflex ailment resulting from some other disease. Weak-

ness sometimes comes from varicoccle or stricture; skin and blood diseases re-sult from blood poison taint, and physi-cal and mental decline follow long-stand-

Italian Senator Talks of Stupendous Possibilities of United States and Probable Effects Thereof.

ROME, April 2.—(By Atlantic Cable.) Senator Vilarl, in an address delivered today before the King and Queen at the opening of the International Historical Congress, made several allusions to the United States. He said Europe was shut in between two great powerful countries. reat powerful countries—Russia on the east and the United States on the west. The latter, from a population of 30,000,000 had risen to 80,000,000, and no one knew what number its population eventually would reach. The United States had taken the lead in United States had taken the lead in all works of progress and civilization. These two forces, acting on Europe, were likely to render necessary a union of the different European countries, which would completely change the geographical situation, to the universal advantage of Europe. The Senator added that he foresaw and predicted that the twentieth century will perhaps see the solution of many problems.

"The mixing of the white and black aces," he continued, "brought about he war of secession in the United tates and the liberation of the egroes from slavery, but this had not armonized or amalgamated the two aces, which hate each other now, erhaps, more than ever before. "The United States probably will be the dirst to give us an indication how a deal with such grave and important questions which Europe must meet hroughout the two immense contients of Africa and Asia."

Miss Craig's Find.

A woman named Stewart, while visiting Long Beach on Saturday, dropped a bag containing diamonds valued at \$1200. Miss Jennie Craig, daughter of Policeman Craig of this city, picked up the valuables, and after advertising them in vain for several days, turned them over to the Chief of Police. Mrs. Stewart, going to headquarters, to report her loss, was rejoiced to learn they had been found. She presented \$60 to Miss Craig.

The design, reproduced herewith, was prepared by John Parkinson, who, at yesterday's primary ses-sion of the joint committee, was chos-en chief architect of the enterprise. Other plans, prepared by various ar-chitects, are expected to follow witha short time, gibing the committee opportunity to choose the best. since it was empowered by the Coun-cil to take charge of convention half plans, the Citizens' Commission has pushed the movement forward with vigor, and the first tangible results of its work became evident yesterday. All members of the commission attended the first meeting, which was held at the Chamber of Commerce, and with them was the entire Building Committee of the Council. Those present were Charles Silent, J. S. Slauson, W. G. Kerckhoff, Charles H. Toll and O. T. PRETTY HALL

AND IMMENSE.

The design submitted by Architect Parkinson's Design.

The design submitted by Architect Parkinson contemplates a steel-constructed building after the Italian renaissance, with an introduction of the idea of the California mission style. His plans call for a building approximately 150x309 feet in size, two stories in height at the sides and with an arched roof of glass. Wide entrances at each end make it possible to drive in and through the building, a feature that would be desirable for Fleats parades, horse shows and other events of similar nature. On these occasions the seats could be removed from a portion of the main floor.

Seating arrangements are planned for 12,000 persons in the main auditorium, while, by the raising of large steel curtains in balcony arches, all rooms on the second floor could be thrown open, affording seats for 8000 more persons, or a total seating capacity of 20,000 for the entire building. Accommodations for 2000 persons are provided on a platform or stage at one side for a large organ.

Surrounding the central portable floor of the mulin auditorium is an of that of Madison Square Garden, New York, and leading from the corridors on the main and second floors are large rooms that could be used as art galleries, museums and even for small meetings.

Mr. Parkinson states that his design is but a preliminary sketch, subject to

small meetings.

Mr. Parkinson states that his design is but a preliminary sketch, subject to changes. He expects to visit St. Louis, Kansas City and Chicago in the near visions future, to inspect similar buildings in those cities, and the results of his interestications will be incorporated in design.

An electric street car yesterday afternoon bore to a grave in Pasadena Cemetery the remains of the man who invented the electric motor. FOUGHT GRIM WOLF.
Until the latter end of his life, Dr.
Lillie engaged poverty as the keenest
foe of his scientific abilities and mechanical conceptions. Though an associate for half a century with many
great and a few influential men, he
proved a wanderer far from Fortune's
smile, until sixteen years ago, when
with his family, he came to Los Angeles and cast his lot with the Angel
City folk. He had accumulated a
modest competence, and this he invested wisely in Los Angeles, buying
and selling real estate, turning over
his money, prospering, until at the
time of his death he had amassed a
fortune of not less than a quarter of a
million of dollars.
A tall, handsome and vigorous old,

man, Dr. Lillie was a notable figure anywhere; and his was the happy lot to carry with him to the very brink of the grave an acute and progressive mind. Friends and acquaintances noted that he falled physically of late, but none observed a dimming of the fine mentality that marked him a man unusual among his fellow-men. TOOK FIRST CHICAGO CENSUS.

Among the sites suggested were the Foy property, bounded by Seventh, Figueroa and Orange streets: a lot at the corner of Eighth and Figueroa streets: the old hay market, bounded by Sixth, Seventh, Hope and Flower streets: Fiesta Park, bounded by Grand avenue, Twelfth, Pico and Hone streets: and the west half of the Childs property, new owned by H. This afternoon the blanket franchise application will come to a hearing before the Board of Public Works. Members of that committee assert a determination to force the hand of W. M. Garland and to demand further knowledge of the backers of the blanket application before considering it further. They say they will not concern themselves with mysterious plans-emanating from unknown franchise magnates.

That the Southern Pacific Railroad

Company will be named, in the event that Garland reveals his ostensible backers, is considered highly improb-able. It was learned from a reliable source yesterday that the agents of the npany are making frantic endeavors to secure the consent of prominent east-ern financiers to allow their names to be used in connection with some scheme of great import and it is surmised that the blanket franchise application is the

Today the board will inform the backers of the blanket franchise that the tunnels must be eliminated from the routes, and the application revised in many respects. This is expected to form the basis for a plea of postponement. It was stated last night, however, that the board will demand to know the names of the men behind the guns before proceeding further.

Chairman Notziger left last night for Riverside, but he is expected back in time for the session this afternoon. It was learned last night that the Joung eugineer named McClure, who it under Assistant Superintendent Edgar L. Swaine of the Southern Pacific, re-i

cently spent some weeks in the City Hall investigating franchise routes and street grades.

TROUT SEASON.

PETITION TO SHORTEN IT. pervisors to enact an ordinance short ening the open season for trout. The old ordinance, fixing the period dur-ing which trout may be caught, makes the open season extend from June 1 to September 15. The petitioners wan September 15. The petitioners want to limit it to the two months of June and July. The petition is signed by H. W. O'Melveny, F. A. Walton, W. Cardwell, R. H. F. Variel, James Cuzner, W. G. Kerckhoff, A. C. Jones, George S. Safford, J. M. Elliott, Hugh W. Vall, J. A. Graves.
This petition has stirred up some opposition among amateur fisherman and sporting supply houses.
A hearing will take place before the Supervisors April 7, at 2 p.m.

Tourist Parties To the East

If you are a visitor in California planning to go east again, or if you live here and are going to make a trip; and particularly if you have never been through Colorado, past the magnificent mountain scenery which is famous all over the world, will you kindly give me the opportunity to tell you about our personally conducted tourist parties which leave every week for Omaha, Kansas City, Chicago, St. Louis and points beyond. I really believe that I can be of great points beyond. I really believe that I can be a service to you in several ways—by telling you how you can save money and by relieving you of many little responsibilities incident to starting on a long journey. My business is to take a personal interest in each one of our patrons and see that everything in each one of our patrons and see that everything the second of the second or the second of the second is done to make your trip over our line as comforta-ble, interesting and inexpensive as possible. The people who have used our line are the best friends we have.

Will you cut out the coupon below, send it to me, and give me the privilege of telling you what we have to offer?

that Mrs. Lee's consort, a bartender at the Golden Eagle, had beaten her. Mrs. McBride said that the bartender had hit the woman on the jaw about a week ago. The result of the autopsy week ago. The result of the autopsy bears out these facts, but does not necessarily incriminate the bartender, as further examination showed that the woman had been an unusually heavy drinker and had taken very harmful medicine. Coroner Trout stated that the part the bartender played in the woman's death may have been important, and that a further investigation will be made.

Mrs. Lee left two children, a boy and a girl, who are in an orphan asylum. Among the effects of the woman was an insurance policy for \$120. Her mother lives in Briton. Pa., and a letter from a sister was found, which indicates that there is some real property there in the dead woman's name. The Coroner will hold an inquest this morning.

Wasting of water CAUSES THE MUD.

SUPERINTENDENT EXPLAINS THE PRESENT CONDITION.

Millions of Gallons Lost While W Sleep-In Clover a Year Hence, With a Billion Gallons in Reservoir-Passing of Old Zanja.

During the somewhat protracted rainy spell that has blessed this region, the city water has been clear as when it wasn't raining, consequently many persons are at a loss to under-stand why the water became murky yesterday, after the rain had ceased. yesterday, after the rain had ceased, superintendent Mutholland gives a lucid and satisfactory explanation in a very few words. He said last night:
"In order to prevent this condition, when the rains set in we shut off the inlets. We began the siege with 62,000,000 gallons in the reservoirs, but the people of Los Angeles are so prodigated of their water, that every night, while we sleep, they consume 8,000,000 gallons, of which, we know to a certainty, at least four-fifths is wasted. The result was that the supply was exhausted before the river had cleared up, and the murky water is the result was that the supply was exhausted before the river had cleared up, and the murky water is the result. It is an unavoidable affliction, but is neither serious nor permanent. "It is common with all river towns dependent upon surface flow, and I have always advocated getting our water from the sub-flow in the lower depths, and we are now in sight of 6,000,000 gallons a day from that source as soon as the machinery arrives.
"A year from the present time, no such trouble will be possible. We will have storage for 960,000,000 gallons, and a daily flow of 8,000,000 gallons, and a daily flow of 8,000,000 gallons from the linfitration gallery, now being constructed.
"The old and expensive ditch method Superintendent Mulholland gives

"The old and expensive ditch method of distributing water for irrigation," said Mr. Mulholiand, "will be permitted to die, without any formal action of the water department, by the absorp-tion of all the water for domestic pur-poses. We have between 12,000 and 15,000 more people to supply than we had a -ear ago, and every gallon of water is needed.

"For twenty-five years these old

had a "ear ago, and every gallon of water is needed.

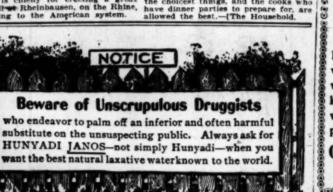

"For twenty-five years these old ditches have been a source of great expense. Why, I know of one of the ditches upon which was expended last year \$1375, and a salary of \$75 per month in addition, and the return to the city was but a little over \$300."

A tight cement conduit, 4x5 feet, will follow the course of the old ditch, now occupying the city's right of way, and will thus usurp its place, and those who for many years have been using win thus usurp its place, and those who for many years have been using the ganja water for irrigating lawns and orchards, will do just like other people, and take it from the pipes.

took hard wallops that would not do anyone any good.

Giving all the credit to Walcott that is due him for his fine showing, it is a cinch that no one would make him a 10-to-7 favorite again over Woods.

In the first preliminary Johnny Bryant beat Kid Long in five rounds, knocking him down three times in the five acts, when the seconds threw up the sponge. Clyde Burnham and Jack Woods fought six fast rounds to a draw in the second event.

SAN LUIS OBISPO COUNTY.

ROBBED FREIGHT CARS. SPECIAL CORRESPONDENCE OF THE TIMES, SAN LUIS OBISPO, April 2.—Ray Stearns, James McAuley, Charles Defreene and Rupert Downs have been held to answer before the Superior Court on a charge of having broken into freight cars on the San Miguel siding and stolen a varied assortment of valuable merchandise. The men were caught in the act of selling the

goods. This sort of robbery has been going on in this county all winter. HEAVY FALL OF RAIN. ninth. Lawler hit to right, was sacriced to second by Toman, got to third on Hall's pass and scored the winning run on an error of Zinsar.

The excitement was fierce at times on account of the close score, but no very startling plays appeared to make things lively. Portland can play bell, however, and will surely make the locals hustle the balance of the week. The

NEWS BRIEFS.

Joseph Edgar, a prominent local capitalist, was found dead in his bed Wednesday morning. He had been suffering with heart trouble for some time. Deceased leaves an estate valued at \$100,000. He was a single man.

Train service on the Southern Pacific is much delayed by landsildes on this section of the Coast line, occasioned by the heavy rains. The company is compelled to keep a large force of men constantly at work clearing the track. Arch C. Haskins of this county is to be appointed a deputy in the office of Surveyor-General Woods.

City Engineer Frank Walraven was quietly married last evening to Miss Bessic Truell of San Francisco.

The local lodge of Odd Fellows has elected George W. McCabe and S. V. Wright as delegates to the Grand Lodge. NEWS BRIEFS.

The Pope on His Chair of State.

The fact that the Pope stood on the platform of his chair of state the "Sedia Gestatoria," as he was carried into the nave of St. Peter's and rose again in the same way as he left the Basilica, after blessing the assembled thousands, only goes to prove his extraordinary pluck. To be able to stand steadily on that moving chair is no triffing feat for a man of 93. The famous conveyance is nothing more than a flooring about six feet long and four wide, upon which is fixed a gorgeous throne encrusted with ivory and gold. Long poles, like those of an Indian palanquin, project from the four corners, and four footmen of the papal household carry these high on their shoulders. The dress of these men is magnificent—not the particolored garb of the Swiss Guard, but wide-skirted coats of a deep shade of crimson brocade and knee breeches. The footmen are carefully matched in strength and size and trained to glider ather than walk, so that their illustrious master should find the motion as little distressing as possible. Yet

BANK ADVERTISING. The most notable instance of the benefits of bank advertising of which we have any rec-ord, says an exchange, is furnished about fourfold in the past four years, and during the past year 14,000 new depoil accounts were opened, which is regarded as almost wholly the result of advertising. The depositors now number 35,000, with about \$12,000,000 of deposits. This bank has an advertising manager on its staff, and advertising manager on its staff, and advertises regularly in over one hundred and firty newspapers. PRUNE SITUATION. The prune cutation is sized up by a New York into a follows: "The market is unsubtedly duil, but on full count Santa LE obselvedly dull, but on full count Santa Clara fruit holders are showing no particular weakness. We have had almost three months of dull trading and in that period the market has not declined more than ½ of a cent per sound on 40-50s and 50-50s. This is considered remarkable in view of the quantity of irragular counts and low grades that have been on the market, and goes to show the position of the article in all quarters. Stocks in this market, all told, are not estimated to exceed 125 carloads. This is a larger stock than was figured at this time last year, but against the smaller holdings last year must be counted the jack.

of suching yet to interfere with a better movement later on.

"Our advices from the Coast state that the total holdings of prunes there do not exceed foo carloads. Of this dumnits, fully 90 per cent, is in the hand of the packers, who are showing a beld front. Most of these holding, we are told, cost close around, the Dresent asking prices on the Coast. Packers apparently feel reasonably secure in holding their stocks, as under ordinary conditions the new crop is not likely to open below this figure. in this market should feel nervous. Last year we had a good summer trade in the article, the month of June being especially active. There is also a good demand usual in September, buyers purchasing to fill their early fall requirements. New fruit does not as a rule reach this market before October. The prospects for the season on new fruit are extremely indefinite. Last year there was a large crop and a pientiful supply of the small sizes. A small crop usually follows a good harvest year, and if this is followed in 1986, we can expect to see a good supply of large sizes."

Throughout the building everything was kept in green and white. In the room where the guests were received the mantel was banked from the floor up with the white blossoms of the spirce interspersed with Easter lilies, and lengths of broad white satin ribbon. In the reception hall spirce hanked the mantel, an immense wase of Easter lilies occupied the table, and potted plants and large palms were everywhere. Bride roses and rare ferms were used in the other Ebeli rooms and the Shakespeare room, while the auditorium was ail in green, festions of asparagus plumosas being caught to the great overhead beams, and green wedding belis hung at each point. Falms concealed the stage. Cumnock Hall, always an ideal setting for a social function, has seldom been the scene of so brilliant an assemblage; and among the dresses worn last night were some of the most elegant that have appeared in Los Angeles.

MINES AND MINING. NOTHER CONSOLIBATION OF MOCTEZUMA.

VALUABLE PROPERTY ACQUIRED BY SONORA COMPANY.

American Capitalists Find Plenty of Openings-Poland, Mill Closed Owing to Eight-hour Law-Attorney Conroy Fined for Contempt.

Another group of valuable mineral properties in the famous Mocteguma district of Sonora, Mex., has been ac-quired by the Sonora Development ompany, now one of the biggest mining operators in that part of the country. By the recent transfer the Sonora company has obtained control of the Pittsburgh, Portland, New York, Velox. Kangaroo, Three Georges, St. Louis, Peking. Boston and Maine mines, all of which have been opened up.

Several of these properties were purchased of Henry Eisenhart of purchased of Henry Eisenhart of Moctezuma, who is now in the city, and Moctezuma, who is now in the city, and who-stated yesterday that already arrangements are being made to begin extensive development. The mines are gold propositions, and are situated in what is known as the Huacal camp, six miles east of Nacozari. The ore body is from two to ten feet in width, and carries high values of the sorrel metal. The company is building a tenstamp mill.

"No district in Mexico gives promise "No district in Mexico gives promise of better things than Mocteauma," said Mr. Eisenhart yesterday, "and it is now one of the most active. The town of Mocteauma has a population of fully 4000, and it is the supply center of a number of camps, among them being the Huacal. San Miguel, Opoto, Huasabas, Nacozari. Samples of the ore brought by Mr. Eisenhart from the camp show remarkable values, some running nearly 2000 ounces in silver, while the gold-carrying rock assays from \$5 to \$1000 a ton.

POLAND MINE CLOSED. EIGHT-HOUR LAW THE CAUSE.

PRESCOTT (Ariz.) April 2.—The Poland mill was closed down today, throwing 100 men out of employment. While the company contemplates changing the process of treating ore, It is given out that the close-down was decided on principally as a result of the eight-hour law passed by the last Legislature. Other companies are contemplating the same action, as an eight-hour day with a ten-hour wage schedule, it is claimed; will increase the expenses of operating 25 per cent. Many of the large producing companies have already established an eight-hour day but the law will mostly affect those being developed, and which have not yet reached producing stage. it is given out that the close-down

Huasabas, Nacozari. There is quite a fair representation of Americans there. One of the most prominent is George F. Woodward, who, besides being general manager of the Sonora Development Company, owns other valuable properties and is one of the largest cattle owners in the State of Sonora. "There is a good opening for American capital that goes in there with the intention of spending money in opening up properties. Gold is not lying around to be picked up, but intelligent development will open up valuable deposits.

The Sonora Development Company is a consolidation of thirty-five mines, embracing the interests of the Goodlander Mining and Milling Company. The company has gold, silver and copper deposits that promise great richness, and within the next thirty days several hundred men will be on the company's pay roil.

In the same district, the El Globo was recently purchased by Miwaukee capitalists, who are now erecting a ten-stamp mill. The San José mine was also recently sold. A French syndicate secured this property for something like \$60,000. It has a ten-stamp mill amost ready for business. In the Nacozari camp the Phelpa-Dodge company is erecting a smeiter that will have a capacity for 500 tons of ore daily.

"We expect even greater activity when the Nacozari Railway reaches Nacozari," said Mr. Eisenhart. "It has eached Cos, and the distance to be finished is about twenty-five miles, over a level country, with easy grades. The delay in finishing the road is said to be due to the fact that the company decided to finish the line from Douglas to El Paso before sping farther south. This is now completed, and the work on the Nacozari line will probably be begun at once. This line will mean a great deal for that part of the country. The shipping of ore will be one of the important features, as there are many miners working claims near the route who have been unable to ship their product owing to the high tariff, but who will do so when he road is in operation."

Craig and the minor bosses of the San Pedro unions are trembling in their boots lest the organization break up, and they lose their fat jobs as walking nuisances. Yesterday afternoon, according to information which leaked out from a union source in Los Angeles. Craig and his co-loafers got together and wired Samuel Gompers, the chief of the whole outfit, that the life of the San Pedro unions is at stake, and that something must be done to make them win the fight now being waged. Gompers replied that he will send a representative, and that man is Andrew Furuseth of San Francisco, secretary of the Sailors' Union of the Pacific. This appeal to headquarters is a good indication of the unions' weakness in San Pedro.

Model Manufacturing Community to Be Located Near Alhambra.

Millionaire Joins Hands With Aifred Dolge, Founder of Dolgeville, New York, in the Greatest of His Enterprises-Felt Will Be Manufactured on Large Scale-Undertaking Well Under Way.

THE latest known enterprise of H. E. Huntington is the greatest of them all. Cooperating with Alfred Dolge. the founder of Dolgeville, N. Y., he proposes to establish a model town. It s to be an industrial community built

from the ground upon ideal lines, and will be located near Alhambra. This is the most interesting experi-ment recently attempted in California. There are few men in the country who can build a town, but Mr. Dolge and Mr. Huntington are two of them, Mr. Doige has already done it, and Mr. Huntington has both the money and brains for it. Their new California town will manufacture felt, as a maker of which Mr. Dolge has a world-wide reputation. The undertaking is so well under way, that part of the ma-chinery has been bought, and a round sum of money has been put up by the

sum of money has been put up by the millionaire backer of the enterprise. For the last five years Mr. Doige has been living rather obscurely in this city, and at Lamanda Park, on health's account; yet all this time he has been making a careful, compara-tive study of Los Angeles as a future felt center, and his conclusions have tive study of Los Angeles as a future felt center, and his conclusions have led him to undertake for this section some gigantic plans in a brand-new industry—brand new, that is, so far as California is concerned, but an indus-try that Mr. Dolge himself pioneered

FELT TRADE IMPORTANT.

Negotiations between Mr. Dolge and Mr. Huntington for the establishment of large works for manufacturing feits have been pending for a long time—more than a year, perhaps. At first Mr. Huntington was dubious of the possibilities of the trade. The stock market and transportation opportunities were exactly in his line, but the felt market he had never felt; consequently he was graciously dilatory in taking any action upon Mr. Dolge's enthusiastic proposals.

Mr. Huntington knew that Mr. Dolge's reputation as a felt manufacturer was worldwide; that Mr. Dolge's connection with a great enterprise would assure its positive success; that the Dolge was there, were recognized the world over as the best of their class, having taken first premiums at the World's Fair at Vienna in 1852, at Philadelphia in 1876, and at Chicago in 1893. Then Mr. Dolge proved to him that the three requisites for perfect conditions in felt manufacture are sunshine and wool and water.

WHY WE CAN MAKE FELT.

WHY WE CAN MAKE FELT. led him to undertake for this section led him to undertake for this section some gigantic plans in a brand-new industry—brand new, that is, so far as California is concerned, but an industry that Mr. Doige himself pioneered in this country thirty years ago.

In his present venture, as above WHY WE CAN MAKE FELT.

On these points the veteran manufacturer became fairly ecstatic. There is no sunshine like that of Southern Californis: 220 clear days every year.

Better wool comes not off of sheep's back water may be drawn direct from you mountain—pure from the cleanest

Doige and was told of Mr. Hunting-ton's hesitancy.

"Let me go with you to Mr. Hunting-ton," said he, and off they went.

"Do you think the industry will pay here?" was Mr. Huntington's first question of the big eastern felt con-sumer.

question of the big eastern felt consumer.

"Pay" Why, beyond the peradventure of a doubt," was the immediate reply. "Let Mr. Dolge go to making felt again, and I will contract for 10,000 pounds a year for myself, and guarantee to dispose of 100,000 pounds more. There is/no better felt than Dolge's."

Felt is worth about \$4\$ a pound, and is used in the manufacture of piano sounding-boards, cases, felt slippers and many other purposes.

Upon such testimony, Mr. Huntington finally concluded that he should back the new enterprise, and within a short time the Alfred Dolge Manufacturing Company was organized, and will help build a new town out near Alhambra, on Huntington land.

DOLGE TALKS.

DOLGE TALKS. "It is our intention," said Mr. Dolge, "that the town shall be laid out by the very best landscape artist to be obtained. The factories will open up with about 150 operatives, and, we have no doubt, the number will increase to 1000 within two or three years. Therefore, to begin with, we must provide for a colony of about 700 persons. Therefore, to begin with, we must provide for a colony of about 700 persons, and that number will soon grow into a very respectable town. I feel that this great move may justly be called the beginning of the industrial era of Southern California. I came to California about five years ago, broken in body and apirit, stripped of my millions in Dolgeville by two designing secoundrels, but after these years of rest. I am young again, and feel ready to fight the whole world."

And Mr. Dolge, born in Saxony in 1848, looks the very picture of health and energy today.

"You are yet to do your very best work right here in Southern California." Is what Homer Laughlin of this city, who knows him intimately, tells Mr. Dolge.

This pressure is most unusual and is of inconceivable danger to all who come in its way. All the apparatus is carefully protected by a fence, amply placarded, and all handling of the tick-lish equipment is done with a long wooden pole. This is the kind of a current that does not wait for you to come to it before hurting you; it literally "jumps" at you while you are several feet away.

The city lines of the Traction Company are still supplied by their two small machines in the old power-house and by the Edison Electric Company. The old machinery will all be transported across the way to its new quarters in a month or so, but as it must move and yet not interefer with the traffic on the company's lines, it is rather a slow job.

Two batteries of four heavy boilers each are also in the fire-room of the new plant, and were working yesterday.

With the new generator taking care of the coast line, and with ample assistance from the Edison company, the Traction people will be able to bold their own now, notwithstanding the serious accident which so recently happened to their plant.

THE CHILDREN OF THE WHITE HOUSE.

There's romping in the Red Room,
And whooping in the Blue;
There's shouting in the attic,
And in the cellar, too.
The White House floors are strewn with
toys
That once were whole and new.

The shouts of gleeful children Ring through the stately halls; The marks of little fingers Are on the spiendid walls; A newer benediction on The storied mansion falls.

There's pounding on the stairways, And little cribs are where The rooms were cold and empty, And many a little pair Of socks hang on the clothesline wh They do the washing there.

There's gladness and there's laughter,
And with the day begin
The whistling and the singing
That help to make the din.
Ah. children of the White House, you

Mr. Dolge.

In explanation of his stand against the approval of the Cuban treaty, which was supported by all other Republican members of the upper house of Congress, Senator Bard said he believed in standing by the true Republican policy with regard to reciprocity. "I do not believe," said he, "that Blaine, McKinley or others who framed the reciprocity policy of the government, intended to sacrifice the agricultural industry of the country, and I could hot support a measure that so seriously menaced the interests of California, especially with regard to sugar and citrus fruits, and also affecting walnuts, dried fruits and raisons.

occurred, and in less than a haif hour, an innmense crowd gathered about the head of the shaft.

A force of volunteers was quickly organised, and went to the assistance of the miners supposed to be imperlied below. When they reached the foot of the shaft they made their way to that portion where the men were supposed to be. They were met by some of the mine bosses, and informed that there had been an explosion in No. 3, in the Third East gangway of the mine. There were 100 men working in that portion of the mine, and it was feared they were all lost. Rescuing parties, however, found them all within haif an hour, and none was burned nor in any way injured.

The explosion was caused by a miner with a lamp running into a body of gas. Apart from the weeked doors no damage was done to the mine.

AN IDEAL TOWN.

The proposed new town is to be ideal in all its appointments—no hovels, no huts, no tumble-down shacks, but attractive comfortable homes for the eratives that will be employed in the big manufactory; not the ordinary four-by-four cottage, but homes that shall be adorned with some architectural nicety: not square blocks of land and straight streets, but a town that shall more closely resemble a huge park, centered with the factories and structures incident to a great industry, ground which shall dwell, in comfort and content, the operatives that shall enjoy employment in the quasi-Ctopian realm.

Nor is the project impossible, as those familiar with the wonderful accomplishments of Dolgeville, N. Y. well know, and it will pay, else would the seal of the Huntington approval not attach. four-by-four cottage, but homes that

Where the new town is to be located is not yet officially announced. Mr. Doige will not say, and Mr. Huntington will not say, and Mr. Huntington will not sate at this time, but from certain knowing quarters it is learned that the proposed townsite is near Alhambra. Well known it is that Mr. Huntington has been making heavy land purchases thereabouts recently, and some of these tracts are excellently adapted to such a purpose. There is a property, however, that could not be better adapted, and that is the Shorb winery property, of less than 560 acres, which has just been purchased by Mr. Huntington, Although the rumor cannot be con-

Cummings left Merrifield's at 10:30 o'clock, and profably went with Mrs. McDonaid direct to the California Hospital. It is not to be supposed that he left the woman before 11:30 o'clock. He arrived at the corral at about midnight, certainly not before. He unlocked the door of his cabin, entered, and lighted the lamp which was fastened at the top of his bed. It is probable that the murderer followed him, at least for a short distance. Cummings undressed immediately and went to bed. After this the mind must

Those who went into the cabin remarked on the fact that blood was spattered at such a distance from where Cummings was found. The terrific blows, dashed with all the force of a strong man's strength, were possibly sufficient to cause this. Cummings may have writhed and shaken himself in his death agony.

The robbery was probably a blind. None who have investigated the case believe that it was the motive. It is very likely that the murderer was not so affluent that he would refuse the chance when it was presented. Cummings's friends were not among the nabobs, and so, of course, his enemies were not. Can any one afford to suffer the distress and pains and torture of these troubles in the face of an absolute guarantee like this? The many thousands of cures that have been and are being effected by the use of Kodol has inspired us with implicit confidence in the merits of this remedy. How can we inspire you with this same confidence? To the thousands of sufferers who have not yet heard of or used Kodol, we make this guarantee—to refund the money to any and every person who takes Kodol without being benefited or perfectly satisfied. We know there are thousands suffering with indigestion and dyspepsia who, if they only knew, as we do how good a medicine Kodol is it is possible that we could not prepare it fast enough. We want you to know Kodol as we know it. We realize that the only way you can do this is to try it. If you knew it would cure you, you would be willing to pay ten times the cost—yes, a hundred—a thousand. Let us help you get well. Won't you accept this guarantee?

CITIZENS' COMMITTEE OF SIXTY DISCUSSES PROJECT.

Structure and Site to Cost Two Hundred and Pifty Thousand Dollars, Located Close to Business Center, the Plan Pavored-Half That Sum Needed.

Evidence of friendly interest and de-termination was manifested at a meet-ing of about twenty prominent citizens last evening to further the undertak-ing to secure modern and adequate headquarters for the Young Men's Christian Association of Los Angeles. It was the first meeting of the Citi-zens' Committee of Sixty, recently called to their aid by the board of di-rectors of the local association, and

called to their sid by the board of directors of the local association, and
was held in the Y.M.C.A. parlors.
The sense of the meeting was that
the present inadequate home should
be sold and a new and modern building erected, to be located within a
radius of not more than half a mile
southwest of the present business center, and to cost with the site about
\$150,000.
A personal canvass will be begun today under direction of George Sutherland, secretary of the State committee,
and General Secretary William Cleaver,
in cooperation with the board of directors and the Citizens' Committee,
The plans favored involve raising by
subscription between \$100,000 and \$150,000, which with the \$100,000 and \$150,000,

the membership grew within the next few years. He lauded the work and stood for immediate meeting of the needs.

Secretary Cleaver detailed the deficiencies of the present building and equipment, as compared with the work being accomplished. With a membership of 1306, in quarters intended for less than haif that number, he said they had reached the extreme limit of growth under present conditions. The featility of this field was emphasized, tally 75 per cent. of the 17,000 young men in this city living in downtown lodging places removed from any home influence, assistance, education and entertainment, to the end of making better citizens and saving souls. Plans for the new headquarters were outlined, including a dormitory, cafe, phuge bath, lowling alleys, hand call courts, etc. Mr. Sutherland enhanced upon the wide scope and 'importance of the association to the community and the world, giving statistics and comparisons regarding what is being done in other American cities of the size of Los Angeles.

The meeting then resolved itself into a general discussion, participated in by most of the following named: O. T.

Johnson, Arthur Letts, P. M. Forter, N.-S. Rieckstons, D. C. McGarvin, E. P. Clark, Mr. Porester C. H. Barker, L. W. Forester, C. H. Barker, P. J. H. Ers, J. P. K. Edwards, O. L. Parmeleo, Dr. F. A. C. Moore, Dr. J. A. Cowles, J. Ross Clark and Mr. Warren. The meeting then adjourned and the committeemen were invited to make a tour of inspection of the building.

Many of the ciub women held that the play should be read, not acted, as it is impossible to give a stage representation of the solicitation of subscriptions. J. Ross Clark presided, and explained to the committee that the board of directors was a unit on the new building plan, as full investigation had demonstrated that remodeling the present home would be had policy. He said such repairs would cost \$40,000, turnish quarters incommodious and unsatisfactory, and necessitate further expenditure as the membership grew within the next few years. He lauded the work, and stood for insmediate meeting of the needs.

Secretary Cleaver detailed the deficiencies of the present building and ciencies of the present building and with four vocal numbers. Alhambra Wednesday Afternoon.

Miss Lloyd Galpin's talk on "Experiences in the Phillippines" before the Wednesday Afternoon Club of Alhambra this week was deserving of the appreciation which it received. Miss Galpin has an easy, conversational style of delivery, and her picture of the islands and the people as they are today was vivid and natural. She did not attempt a solution of the governmental problem, but depicted faithfully the characteristics of the different tribes, the picturesqueness of Manila, the nd the many strange sights and as that greet—the American

Acts xx. 25-21: "Paul"s Farewell to Ephesus."

THE CONNECTION.

After leaving Ephesus, Paul went across into Greece, first into Macedonia in the north, where, at Philippile Probably wrote the second letter to the Corinthians; then into the southern section, called Achaia, in which Corinth is situated, where he probably wrote this fetter to the Romans and laise the letter to the Galatians. There he stayed only three months, for a plot was formed to kill him. Instead of going on through Syria and Jerusalem, he changed his plans and went north through Macedonias, seven companions, whose names are given, going forward and awaiting him at Troas. Luke
